"Adopt a positive attitude to life! You should care for your mind and body in equal proportions, in order to feel young for as long as possible. In addition to a rich and balanced diet, it is important to think and act in an integrated way. Provide your body with the necessary support exactly where it is needed."

#### FITNESS & EXERCISE

We tend to go out more during the summer. Walking, swimming or cycling regularly help you boost your body's natural defenses.

"In addition to the combination of a balanced diet and a healthy lifestyle, physical exercise can strengthen your immune system, because it improves the circulation of blood in our organs, leading to an increased production of antibodies that improve the body's defenses and regulative abilities."

Dr. Sven Wechan,
